

## Master Thesis Seminar Report 2025

---

Project "EU partnership to protect agricultural land in the face of climate and environmental challenges. Caring for future generations" (ProLand)

Project KA220-HED - Cooperation partnerships in higher education Reference number: 2024-1-PL01-KA220-HED-000252809

During the winter semester of the 2025-2026 academic year, seminars are held for master's students and their supervisors on:

December 12, time: 10.00-12.30, online

December 19, time: 10.00-12.30, online

The seminars will be divided into four main sections:

1. a review of the relevant literature to the master's thesis subject, including hypotheses and research objectives;
2. a methodological section related to the research area/material and the methods used for analysis as well as an explanation of the hypotheses put forward in the research;
3. results with discussion with graphical and tabular presentation of the most important results;
4. and a summary and conclusion section.

The master's students have to present:

- literature review related to their master's thesis topic;
- the current state of knowledge;
- the gaps that still need to be filled in this area;
- research hypotheses and research objectives.

The second part of the seminars will be focused on presenting research areas, materials used, and the researchers, technologies, and statistical analyses employed.

The considerable attention will be paid to explaining and justifying the selection of methods for research purposes, emphasizing the applied nature of the research.
